Section 1 (Non-Calculator)

Directions:

Today, you will take Section 1 of the Grade 3 Mathematics Practice Test. You will not be able to use a calculator.

Read each question. Then, follow the directions to answer each question. Mark your answers by completely filling in the circles in your test booklet. Do not make any pencil marks outside of the circles. If you need to change an answer, be sure to erase your first answer completely. If a question asks you to show or explain your work, you must do so to receive full credit. Only responses entered within the space provided will be scored.

If you do not know the answer to a question, you may go on to the next question. If you finish early, you may review your answers and any questions you did not answer in this section ONLY. Do not go past the stop sign.

Directions for Completing the Answer Grids

- 1. Work the problem and find an answer.
- 2. Write your answer in the boxes at the top of the grid.
- 3. Print only one number or symbol in each box. Do not leave a blank box in the middle of an answer.
- 4. See below for examples on how to correctly complete an answer grid.

EXAMPLES

To answer 632 in a question, fill in the answer grid as shown below.

6	3	2			
lacksquare	•	\odot	\odot	\odot	•

A brick path has 10 rows of 4 bricks. How many bricks are in the path?

Fill in the answer grid as shown below.

4	0				
$\overline{oldsymbol{\circ}}$	0	•	\odot	\odot	\odot

1 A teacher arranged 42 bottle caps into 7 rows with the same number of bottle caps in each row.

Which expression can be used to find the number of bottle caps the teacher put in each row?

- © 42 × 7
- ① 42 × 6
- **2** What fraction is represented by the point on the number line?

- $\bigcirc A \frac{6}{6}$
- \bigcirc $\frac{5}{6}$
- $\odot \frac{2}{6}$
- \bigcirc $\frac{1}{6}$

3 The following bar graph shows the number of cars of each color that passed by a school during a certain period of time.

How many more silver cars passed by the school than black cars and white cars combined?

Select one answer.

- (A) 3
- **B** 4
- © 6
- ^D 7
- 4 Complete the following equation.

Enter your answer in the space provided.

$oldsymbol{oldsymbol{arphi}}$	$oldsymbol{\circ}$	$oldsymbol{\circ}$	$oldsymbol{\circ}$	$oldsymbol{\circ}$	$oldsymbol{\odot}$

5 Which shape is partitioned into fourths? Select one answer.

6 A student divided a sheet of paper into sections of equal size.

The student drew flowers on some of the sections as shown.

On what fraction of the sections of paper did the student draw flowers?

- $\bigcirc \frac{3}{8}$
- \bigcirc $\frac{1}{2}$
- © $\frac{5}{8}$
- D 2/1

- **7** What is the result when an even number is multiplied by 5? Select one answer.
 - The result is an even number with a 0 in the ones place.
 - B The result is an odd number with a 0 in the ones place.
 - © The result is an even number with a 5 in the ones place.
 - ① The result is an odd number with a 5 in the ones place.
- **8** Which **two** number lines show points that represent equivalent fractions? Select the **two** correct answers.

9 The following figure shows the rectangular floor of Mr. Soto's garage. Mr. Soto will paint the entire floor.

Which equation represents the amount of space that Mr. Soto will paint? Select one answer.

- \odot 4 × 7 = 28 square yards

10 What is the value of the following expression?

$$308 + 97$$

Enter your answer in the space provided.

11 An expression is shown.

$$3 \times 10$$

Which **two** expressions have the same value as the given expression? Select the **two** correct answers.

- © $(3 \times 2) + (3 \times 5)$
- ① $(3 \times 5) + (3 \times 5)$
- **12** Which comparison is true?

Select one answer.

- $\overset{\text{(A)}}{=}\frac{1}{2}<\frac{1}{3}$
- $^{\tiny \textcircled{B}}\frac{2}{3}>\frac{2}{4}$
- $^{\odot}\frac{4}{8} > \frac{5}{8}$

You have come to the end of Section 1 of the test. Review your answers from Section 1 only.

GO ON TO NEXT PAGE

Section 2 (Calculator)

Directions:

Today, you will take Section 2 of the Grade 3 Mathematics Practice Test. You will be able to use a calculator.

Read each question. Then, follow the directions to answer each question. Mark your answers by completely filling in the circles in your test booklet. Do not make any pencil marks outside of the circles. If you need to change an answer, be sure to erase your first answer completely. If a question asks you to show or explain your work, you must do so to receive full credit. Only responses entered within the space provided will be scored.

If you do not know the answer to a question, you may go on to the next question. If you finish early, you may review your answers and any questions you did not answer in this section ONLY. Do not go past the stop sign.

Directions for Completing the Answer Grids

- 1. Work the problem and find an answer.
- 2. Write your answer in the boxes at the top of the grid.
- 3. Print only one number or symbol in each box. Do not leave a blank box in the middle of an answer.
- 4. See below for examples on how to correctly complete an answer grid.

EXAMPLES

To answer 632 in a question, fill in the answer grid as shown below.

6	3	2			
lacksquare	•	\odot	<u> </u>	\odot	(•)

A brick path has 10 rows of 4 bricks. How many bricks are in the path?

Fill in the answer grid as shown below.

4	0				
$\overline{oldsymbol{\circ}}$	\odot	\odot	\odot	•	\odot

Mathematics

1 A student wants to put a border around a notebook that measures 8 inches wide and 10 inches long.

The student thinks that the perimeter of the notebook is 18 inches because 8+10=18.

Which sentence explains how to correct the student's thinking?

- A The student should have multiplied 8 by 10, then multiplied 10 by 8, and then added the two products.
- ® The student should have multiplied 8 by 10, then multiplied 10 by 2, and then added the two products.
- © The student should have multiplied 8 by 2, then multiplied 10 by 2, and then added the two products.
- The student should have multiplied 8 by 2, then multiplied 10 by 8, and then added the two products.

2 Wylie Elementary School has students in 1st through 6th grade.

The table shows the number of present and absent students for different grades on a certain day.

School Attendance

Grade	Number of Students Present	Number of Students Absent	
2 nd grade	85	14	
3 rd grade	104	13	
4 th grade	96	18	

Which **two** questions could be answered based on the information in the table?

Select the **two** correct answers.

- What is the total number of students in the school?
- ® What is the total number of students who are in the 1st grade?
- © What is the total number of students who are in the 4th grade?
- $^{\odot}$ What is the total number of absent students on that day in the 2^{nd} grade and the 3^{rd} grade?

Mathematics

- **3** A teacher is making supply boxes for her students to use when they work in groups.
 - There are 9 supply boxes.
 - Each supply box will have 6 colored markers.
 - The teacher has 15 colored markers to put in the supply boxes.

The teacher thinks that 39 more markers are needed to fill the supply boxes because $6 \times 9 = 54$ and 54 - 15 = 39.

Explain why the teacher's thinking is correct by explaining what the two equations represent in the problem.

Enter your answer and your work or explanation in the space provided.

- **4** A gardener has a rectangular garden.
 - The length of the garden is 6 feet.
 - The width of the garden is 3 feet.

Which expression could be used to find the area, in square feet, of the garden?

- $\bigcirc 6 + 3$
- © 6 × 3
- 6 ÷ 3

5 A pet store owner built two rectangular dog pens next to each other. The picture shows the floors of the two dog pens.

The pet store owner will cover the floors of the dog pens with concrete.

What is the total area, in square feet, of the floors of the two dog pens?

Enter your answer and your work or explanation in the space provided.

6 A point is shown on the number line.

Which two equations are true based on the values represented by the point on the number line?

Select the **two** correct answers.

- © $\frac{1}{8} = 1$
- ① $\frac{1}{8} = 8$
- $\boxed{\$} = 8$

You have come to the end of Section 2 of the test. Review your answers from Section 2 only.

GO ON TO NEXT PAGE

Section 3 (Non-Calculator)

Directions:

Today, you will take Section 3 of the Grade 3 Mathematics Practice Test. You will not be able to use a calculator.

Read each question. Then, follow the directions to answer each question. Mark your answers by completely filling in the circles in your test booklet. Do not make any pencil marks outside of the circles. If you need to change an answer, be sure to erase your first answer completely. If a question asks you to show or explain your work, you must do so to receive full credit. Only responses entered within the space provided will be scored.

If you do not know the answer to a question, you may go on to the next question. If you finish early, you may review your answers and any questions you did not answer in this section ONLY. Do not go past the stop sign.

ection 3

Directions for Completing the Answer Grids

- 1. Work the problem and find an answer.
- 2. Write your answer in the boxes at the top of the grid.
- 3. Print only one number or symbol in each box. Do not leave a blank box in the middle of an answer.
- 4. See below for examples on how to correctly complete an answer grid.

EXAMPLES

To answer 632 in a question, fill in the answer grid as shown below.

A brick path has 10 rows of 4 bricks. How many bricks are in the path?

Fill in the answer grid as shown below.

4	0				
\overline{ullet}	\odot	\odot	\odot	\odot	\odot

- **1** Diana had 63 feet of rope. She cut the rope into 7 pieces of equal length. Which expression represents the length, in feet, of each piece of rope? Select one answer.
 - A 63 × 7
 - B 63 7
 - © 63 + 7
 - ⊕ 63 ÷ 7

2 In which **three** figures does the shaded part represent $\frac{1}{2}$ of the figure? Select the **three** correct answers.

25

3 The figure shows a garden.

The figure is composed of two rectangles that do not overlap.

What is the area, in square feet, of the garden?

- **A** 38
- ® 61
- © 72
- ^D 90

4 Which shape is a quadrilateral?

Select one answer.

5 Point *W* represents a fraction on the number line.

27

Which fraction is represented by point W?

Select one answer.

- $\bigcirc \frac{0}{3}$
- \bigcirc $\frac{1}{3}$
- $\odot \frac{2}{3}$
- © 3/3

6 Terry bought 2 bags of beans. The mass of each bag, in grams, is shown on the scales.

How many grams of beans did Terry buy in all? Select one answer.

- A 700 grams
- ® 650 grams
- © 600 grams
- **7** Round 148 to the nearest 10.

Enter your answer in the space provided.

- **8** Which **two** equations could be used to find the result of 7×5 ? Select the **two** correct answers.

 - ® $7 \div 35 = 5$
 - © $35 \div 7 = 5$

 - \bigcirc 7 + 7 + 7 + 7 + 7 = 35
- **9** Byron will write a fraction that is equivalent to 1. The denominator is 2.

29

What number will Byron use in the numerator to write the fraction? Enter your answer in the space provided.

10 The picture shows marbles in jars.

Which expression could be used to find the total number of marbles in the jars?

- \bigcirc 4 \times 8
- B 4+8
- © 4+4+4+4
- 8 + 8 + 8 + 8 + 8 + 8 + 8 + 8 + 8
- **11** A window is in the shape of a rectangle. The perimeter of the window is 24 feet.

Which **two** pairs of measurements could be the length and width of the window?

Select the **two** correct answers.

- A Length is 4 feet and width is 6 feet
- B Length is 7 feet and width is 5 feet
- © Length is 8 feet and width is 3 feet
- Description
 Descriptio
- © Length is 12 feet and width is 12 feet
- © Length is 14 feet and width is 10 feet

You have come to the end of Section 3 of the test. Review your answers from Section 3 only.

Section 4 (Calculator)

Directions:

Today, you will take Section 4 of the Grade 3 Mathematics Practice Test. You will be able to use a calculator.

Read each question. Then, follow the directions to answer each question. Mark your answers by completely filling in the circles in your test booklet. Do not make any pencil marks outside of the circles. If you need to change an answer, be sure to erase your first answer completely. If a question asks you to show or explain your work, you must do so to receive full credit. Only responses entered within the space provided will be scored.

If you do not know the answer to a question, you may go on to the next question. If you finish early, you may review your answers and any questions you did not answer in this section ONLY. Do not go past the stop sign.

Section 4

Directions for Completing the Answer Grids

- 1. Work the problem and find an answer.
- 2. Write your answer in the boxes at the top of the grid.
- 3. Print only one number or symbol in each box. Do not leave a blank box in the middle of an answer.
- 4. See below for examples on how to correctly complete an answer grid.

EXAMPLES

To answer 632 in a question, fill in the answer grid as shown below.

A brick path has 10 rows of 4 bricks. How many bricks are in the path?

Fill in the answer grid as shown below.

4	0				
$\overline{oldsymbol{\odot}}$	\odot	\odot	\odot	\odot	\odot

Mathematics

1 A gym teacher took some bags of soccer balls to the soccer field.

The teacher put 6 soccer balls in each bag.

What other information is needed to find how many bags of soccer balls the teacher took to the field?

- A the total number of students in the gym class
- B the total number of players on the school's soccer team
- © the total number of soccer balls the teacher took to the field
- ① the total number of soccer balls each group of students will get

2 A student made 20 necklaces.

- The student put 5 beads on each necklace.
- There were 10 beads in each package.

Which statement explains the student's correct thinking to find the total number of beads the student used to make all the necklaces?

- A The student thinks that there are 20 necklaces and there are 10 beads in each package, and $20 \div 10 = 2$.
- $^{\circ}$ The student thinks that there are 20 necklaces and there are 10 beads in each package, and $20 \times 10 = 200$.
- © The student thinks that there are 20 necklaces and there are 5 beads on each necklace, and $20 \div 5 = 4$.
- ① The student thinks that there are 20 necklaces and there are 5 beads on each necklace, and $20 \times 5 = 100$.

Mathematics

3 Rafael will cover a rectangular board with square labels. He will buy packages of square labels. Each package contains 6 labels of the same size.

The following figure shows the side lengths of the board and of one label.

3. Part A

What is the least number of labels Rafael needs to cover the board? Show your work or explain how you found your answer.

Enter your answer and your work or explanation in the space provided.

3. Part B

What is the least number of packages of labels Rafael should buy? Show your work or explain how you found your answer.

Enter your answer and your work or explanation in the space provided.

Mathematics

4 A farmer has a field with 4 rows of apple trees. There are 9 trees in each row.

Which expression could be used to find the total number of apple trees the farmer has in the field?

- A 9+4
- $^{\text{B}}$ 9×4
- © 9-4
- 9 ÷ 4

GO ON TO NEXT PAGE

Mathematics

5 A student has several pennies.

The student organized the pennies into the array shown.

The student wants to put all the pennies in stacks with the same number of pennies in each stack.

Explain three different ways the student could put the pennies in stacks with the same number of pennies in each stack.

Explain how you used the array of pennies to help you find the different ways to stack the pennies.

Enter your answer and your work or explanation in the space provided.

5	

Mathematics

6 A student wrote the expression 7 + 7 + 7 + 7 + 7 to find the value of 7×5 .

The student said that when writing a different expression to represent 7 \times 5, only the numbers 7 and 5 can be used.

Which **two** expressions could be used to show that the student's response is incorrect?

Select the **two** correct answers.

- \bigcirc 5 \times 7
- ® $(4+5) \times (3+5)$
- © $(4 \times 5) + (3 \times 5)$
- ① $(7+3) \times (7+2)$
- (E) $(7 \times 3) + (7 \times 2)$

You have come to the end of Section 4 of the test. Review your answers from Section 4 only.
